Mohammad Ali Jesar

Senior Software Engineer specializing in AI automation. I build AI agents in Ruby on Rails that work with real business data.

Lahore, Pakistan · mohammadalijaisar@gmail.com · mjesar.github.io · github.com/mjesar · linkedin.com/in/mjesar

Summary

Senior software engineer specializing in AI automation, with Ruby on Rails as the core stack and 7+ years of experience building production software for clients in the US and Germany, 4+ of them on Shopify and e-commerce. As part of a team, published apps on the Shopify and BigCommerce app stores. Now building AI agents and LLM integrations that connect models to real application data and business tools, with only the permissions they need, evals, and human approval for the actions that matter.

Skills

- **Backend:** Ruby on Rails, service objects, RESTful and GraphQL APIs, Sidekiq, Solid Queue, Redis
- **AI and LLM integration:** agentic AI, workflow automation with n8n, MCP servers (tools, resources, prompts, JSON Schema validation, read-only and destructive annotations), WebMCP tools for browser AI agents, an MCP client over JSON-RPC 2.0, RAG with pgvector and Voyage AI, tool calling, agent loops, evals, RubyLLM, Claude, OpenAI and Gemini APIs, AI search visibility (GEO and AEO)
- **Frontend:** React, JavaScript, TypeScript, Hotwire (Turbo, Stimulus), esbuild, HTML and CSS
- **Data:** PostgreSQL, pgvector, SQLite, MongoDB (Mongoid), Redis
- **Practices and DevOps:** RSpec, code review, branch and pull request workflow, CI, AWS, Heroku, Google Cloud, Docker
- **Shopify:** Shopify CLI, Shopify Functions (Scripts-to-Functions migration for discount, delivery and payment customizations), Checkout UI Extensions and Checkout Extensibility, Shopify Plus B2B, Theme App Extensions, Liquid, Polaris and App Bridge, Admin and Storefront APIs, webhooks, App Store publishing
- **E-commerce platforms:** BigCommerce apps (Catalog, Orders and Checkout APIs), Amazon SP-API

Experience

Software Engineer, AI and automation, Independent (open source)

June 2026 to now · Remote

- Building AI agents and practices for AI search visibility (GEO and AEO), so websites and brands get found and recommended by AI assistants like Google AI and ChatGPT. Methods include llms.txt, schema.org structured data and WebMCP tools. Built product_geo_agent, which checks whether AI assistants recommend a product, scores it and lists what to fix, with steady scores across 5 eval runs.
- Contributed three bug fixes to little_ghost, an open-source Ruby AI agent framework. All were reviewed and merged by its maintainers and released in 0.11.0.
- Built shop_mcp_server, an MCP server that gives AI agents safe access to business data (products, orders and inventory): 7 tools, approval-gated writes and an RSpec suite.
- Building support_engineer, an AI customer support agent in Rails 8.1 that looks up orders and shipments, tested on a public dataset of about 99,000 orders.

Ruby on Rails Developer, MGLogics

December 2021 to June 2026 · Remote, US clients

- Designed, built and maintained Shopify and BigCommerce apps with Ruby on Rails and React for furniture and retail merchants.

- Contributed to published Shopify and BigCommerce apps covering catalog and order sync, SEO and JSON-LD schema, geolocation redirects and order-fraud prevention.
- Built Amazon SP-API integrations for product listings, variants and image uploads, automating previously manual work.
- Designed Sidekiq background processing for synchronization and long-running jobs, with retries and reliability in mind.
- Handled deployment, versioning and releases to the Shopify and BigCommerce app stores, including platform compliance and post-release support.
- Diagnosed production issues across app code, DNS and email delivery, and supported merchants directly through to resolution.
- Worked daily with US clients in e-commerce, medical and furniture, and gave technical input on proposals for Virginia state government projects.
- Wrote RSpec tests and took part in architecture decisions and code reviews.

Backend Software Engineer, SimpleDeploy

April 2019 to December 2021 · Karachi, Pakistan

- Developed and maintained RESTful API services in Ruby on Rails on SQL and NoSQL databases.
- Built management MVP tools for German clients in real estate and furniture, with code quality, security and testing as delivery standards.

Python AI Bootcamp, Axiom Enterprises

September 2018 to February 2019

- Built Python web apps with Flask and integrated machine learning models (TensorFlow and Keras), from training to testing, in team and individual projects.

AI and open-source projects

shop_mcp_server

MCP server in Rails 8.1 that exposes a store's products, orders and inventory to Claude: 7 tools, 2 resources and 1 prompt, approval-gated writes, transactional orders, and semantic search with Voyage AI and pgvector. Diagnosed a legacy SSE vs Streamable HTTP transport mismatch and moved to the official MCP Ruby SDK.

ai_shop_assistant

Shopping assistant with RubyLLM and Gemini that searches Shopify's live Catalog API over MCP, with Solid Queue jobs, Turbo Stream replies and a hand-written JSON-RPC client after a gem failed on the handshake.

product_geo_agent

AI agent that scores a Shopify product's AI discoverability (GEO and AEO) with five tools, deterministic scoring in Ruby, an eval harness and live tracing.

support_engineer (in progress)

Production-style AI support agent in Rails 8.1, built in 14 lessons. Done so far: import of a public dataset of about 99,000 orders with planted test scenarios, a RubyLLM agent, and four read tools with specs and a recorded tool-calling run. Human approval for refunds, returns and cancellations is planned.

little_ghost (upstream contributions)

Found, reproduced and fixed three bugs in the little_ghost Ruby AI agent gem, all merged and released in 0.11.0: #112 replay Gemini thought signatures across multi-turn tool calls, #113 send the original function name in functionResponse.name, #115 preserve Agent lifecycle hooks when building execution snapshots.

Education

BS-IT (Software), Hons, SAU (HEC Pakistan), 2017

Equivalent to 16 years of education
